

## **Hardware for Naval application**

The talk includes different kinds of naval equipment,  
From harsh shock and vibration tested cabinets  
to ATRs or enclosure which are used in ships and submarines.

As a back bone of the enclosures the backplane and the  
variations will be also a part of this talk.

This talk targets engineers who are dealing with naval  
hardware. The audience should be witness to engineering  
capacity ELMA has.

The bandwidth of the custom products covers backplanes ,  
chassis to complete integrated solutions.
